Respect

1

## Acknowledgement of Country

The Child and Adolescent Health Service acknowledge  
Aboriginal people of the many traditional lands and  
language groups of Western Australia.

We acknowledge the wisdom of Aboriginal Elders  
both past and present and pay respect to  
Aboriginal communities of today.

2

# CAHS Research Education Program

## Research Skills Seminar Series

- Over 20 topics across the research process
  - 1h overview
  - Handouts are provided
- Recorded and uploaded
- Feedback
  - Back of handout
  - Emailed link
- Please hold questions to the end
  - Use provided microphone

3

# Is my research making an impact?

Dr Tamika Heiden  
Director  
Research Impact Academy

[theiden@researchimpactacademy.com](mailto:theiden@researchimpactacademy.com)

4

## Impact Terminology

**“** The verifiable outcomes that research makes to **knowledge, health, the economy and/or society**. Impact is the effect of the research after it has been adopted, adapted for use, or used to inform further research.

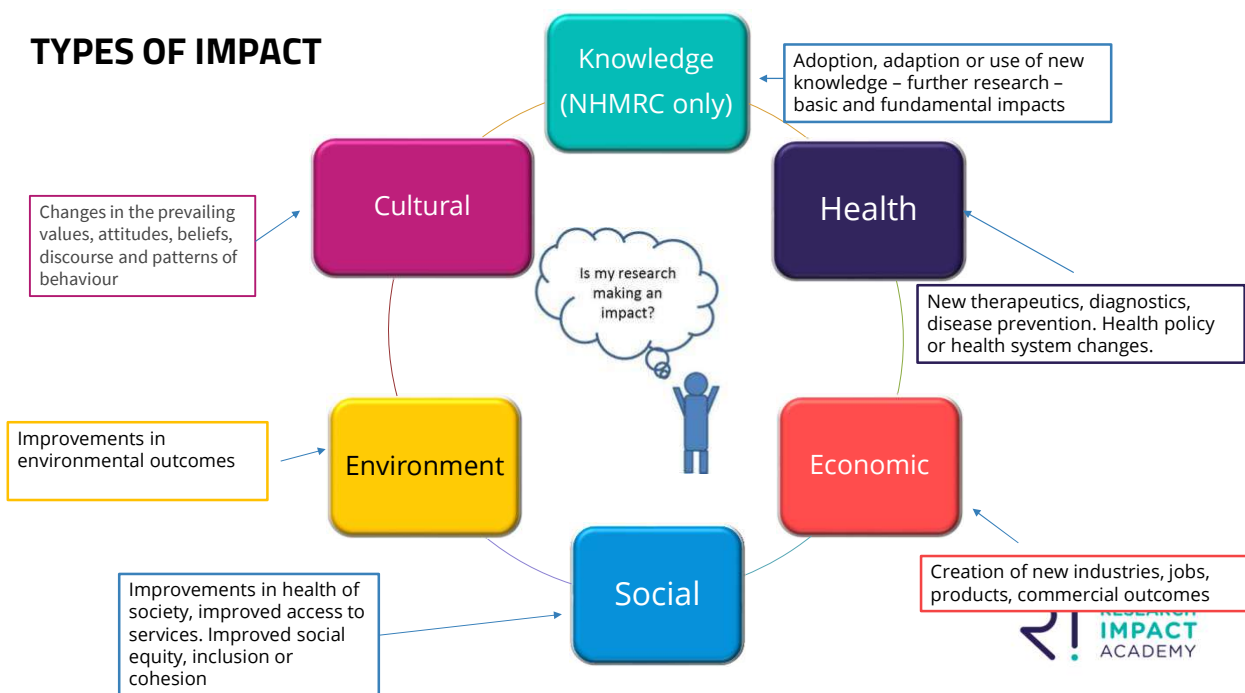

Source: NHMRC – Investigator Grants 2020 guide to applicants on preparing an application

## What does this mean?

- Impact is the effect of the research **after** it has been **adopted, adapted for use, or used to inform** further research, policy, practice and so on...

*(The effect after it has been put into action)*

## TYPES OF IMPACT

# SIGNIFICANCE

The degree to which impact has enabled, enriched, influenced, informed or changed the performance, policies, practices, products, services, understanding, awareness or wellbeing of the beneficiaries.

Source: LSE REF Glossary

9

## Significance examples (indicators)

These are indicators of use/uptake of an output

- Adopted internationally or in other fields of research
- Adopted into practice
- Influence on policy
- Change in time to triage patients (mins/hours)
- Citation in another discipline
- Reductions in rates of smoking (%)

Copyright Research Impact Academy 2024

10

## REACH

The extent and/ or diversity of the beneficiaries of the impact, e.g., constituencies, numbers of groups, as relevant to the nature of the impact.

Source: LSE REF Glossary

11

## Reach examples (indicators)

- Reach is typically numbers

- 

10,000  
DOWNLOADS OF  
AN ARTICLE

400 SUBSCRIBERS  
TO AN APP

100 ATTENDEES AT  
AN EVENT

1000 MEMBERS OF  
AN ORGANISATION

200 PEOPLE  
TRAINED IN A  
PROCESS

Reach does not tell you if the information was used or if anything changed.

Copyright Research Impact Academy 2024

12

## Types of impact - Prospective

This is a type of research impact analysis that aims to predict the potential impact of research before it is conducted or as it is being conducted.

It is considered the pathway to impact.

Prospective impact can inform decisions about which research to fund, how to design the research for maximum impact, and how to disseminate the research effectively.

*Copyright Research Impact Academy 2024*

13

## Types of Impact - Retrospective impact

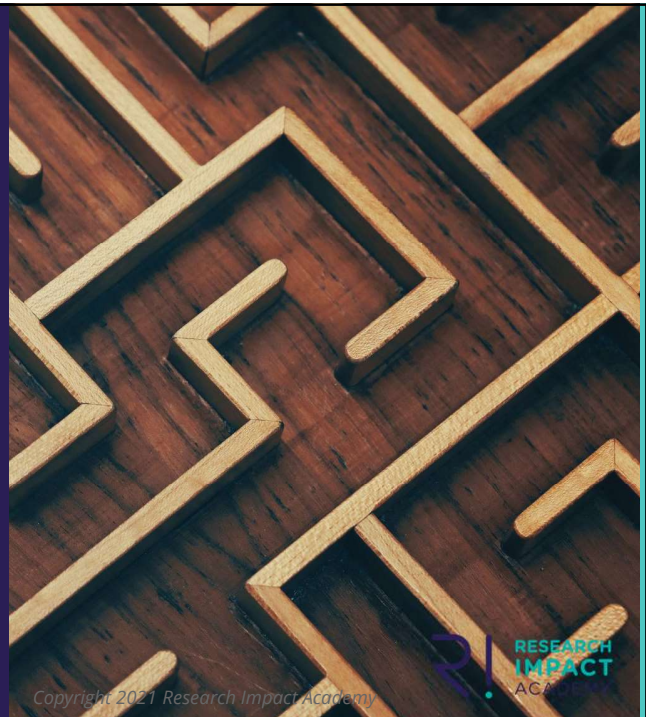

- Refers to the analysis and evaluation of the **actual outcomes and changes** that have occurred as a result of a research project or initiative, after its completion.
- This assessment aims to understand and measure the real-world impact and benefits that the research has delivered, and may be used for reporting, evaluation, and to inform future research strategies and funding decisions.

17

## Elements of successful impact

18

## Impact Outputs & Activities

19

## Outputs & Activities

### Outputs

- Any form of deliverable embodying the findings generated by the research. Deliverables differ by user and audience and are the direct products and/or services stemming from the research.

### Activities

- The actions such as dissemination, collaboration, and consultation that **translate & disseminate** research for stakeholders to adopt and use to make a difference.
- These are different from research activities although they may occur in parallel with the research process.

20

## Outputs/Activities examples

- Evidence and recommendations
- Research monographs and essays
- Reports, executive summaries
- Digital Archives and Databases
- Conceptual papers, books, chapters
- Patents and spin out companies
- Fact sheets
- Success stories/cases
- Multimedia/digital works
- Videos, podcasts, PowerPoint presentations
- FAQs, tool kits, tutorials, promotional materials
- Frameworks, datasets, methodology

Copyright Research Impact Academy 2024

21

## Impact indicators of change

22

## What are outcome/impact indicators?

### Defined:

- Indicators are quantitative or qualitative factors or variables that provide a simple and reliable means to measure achievement and change, track progress to impact, and feed into organisation reporting systems.
- For example:
  - the number of new jobs created (#),
  - \$ increase in revenue, or
  - changes to length of hospital stay (e.g. days).

**Baseline measures are helpful (show difference)**

## Knowledge impacts

### Basic/fundamental research/ECRs

Output	User	Outcome
Dataset	Other researchers	Dataset/database used in other research areas
New Methodologies <ul style="list-style-type: none"> <li>• Test procedures</li> <li>• Statistical analysis</li> <li>• Research Design</li> </ul>	Other researchers/ disciplines	<ul style="list-style-type: none"> <li>• Use of an existing procedure in another discipline that provided new efficient/effective way of researching</li> <li>• Use of new methods by other research teams.</li> </ul>
Books/ textbook chapters	Teachers, education sector	<ul style="list-style-type: none"> <li>• Use of books in teaching/curriculum</li> </ul>
Patents/spinouts	Business	Value of companies, use of patents
Research publications <ul style="list-style-type: none"> <li>• Evidence</li> <li>• Recommendations</li> <li>• Key findings</li> </ul>	Researchers, discipline experts Research centres Authors of books	<ul style="list-style-type: none"> <li>• Citations, awards, endorsements</li> <li>• Large industry investment based on findings</li> <li>• Move into clinical trials</li> <li>• Work used as pilot data that led to large international collaborations and significant international funding</li> <li>• Invitations to be expert witness or give testimony</li> <li>• Use of your work in books/textbooks</li> </ul>

25

## Knowledge maps

Outputs/Activities	Users	Outcomes	Impacts (indicators)
<u>New basic science technique (Protocol Z)</u>	Research users in the fields of x and x	Adopted <i>Protocol Z</i> in their study of xxxx	Researchers in the field of xxxx using <i>Protocol Z</i> have been able to develop new drugs/treatments/ commercial products etc
Journal article	Researchers in 10 disciplines	My research on xxx has been used in 6 countries by researchers across 10 disciplines including x and x and x.	Use of my work in x led to xxxx

26

## Health impact example - Folate and Birth Defects

Outputs/Activities	Users	Outcomes	Impacts
Health			
Folate research Research publications Health promotion campaign Policy briefings Advocacy - Stakeholder negotiations (flour millers) Clinician education	<ul style="list-style-type: none"> <li>Australia and New Zealand Food Regulation Ministerial Council (Policy Makers)</li> <li>Clinicians</li> <li>Flour Millers</li> </ul>	Changes to policies. All breadmaking flour in Australia fortified with folate. Public awareness  <i>*Citation in policy, documented evidence from policy maker</i>	Reductions in Spina Bifida Births. Neural Tube Defects prevalence in Aboriginal infants in WA fell by 68% following fortification.  <i>*Follow on research findings (publication)</i>

*\*Evidence examples in red*

27

## Identifying impact and gathering evidence

28

## Strategies to identify and map impacts

- Workshops with relevant groups
- Interviews – one on one
- Focus groups
- Competitions

**ASK** the users of the research

- Inclusion of researchers and end/users in the interviews
- Interviews with beneficiaries

## Strategies for tracking impact Prospective

Put elements in place when planning the deliverables.

- Make citation easy – make sure all documents have citation or ISBN etc to make tracking easy.
- Build in data capture at things like exhibitions (surveys)
- Be creative! How to gather data - QR codes / exit interviews / ask the users

## Five Challenges and Considerations for creating and capturing research impact

31

### **Challenge: Diverse Definitions of Impact**

- Impact can vary widely across disciplines and contexts.
- Different stakeholders may have distinct expectations and definitions of what constitutes impact

32

## **Challenge: Difficulty in Measuring/assessing Impact**

- Determining the appropriate metrics and indicators to quantitatively measure impact can be difficult.
- Some types of impact are difficult to quantify, track and evidence

## **Challenge: Attributing Impact**

- Challenging to attribute impact solely to a single research project or researcher.
- Impact is often the result of a collective effort.
- Overcoming attribution (not easy)
  - Use of pathway, show connections, engagement and involvement
  - Show logical progression and linkage between knowledge shared and changes resulting.
  - Evidence from users

## **Challenge: Time Lag for impact to happen**

- Impact can take years or even decades to fully manifest.
- Assessing short-term impact may not capture the full scope of a research project's long-term influence.

## **Challenge: Balancing Data: Quantitative vs. Qualitative Data**

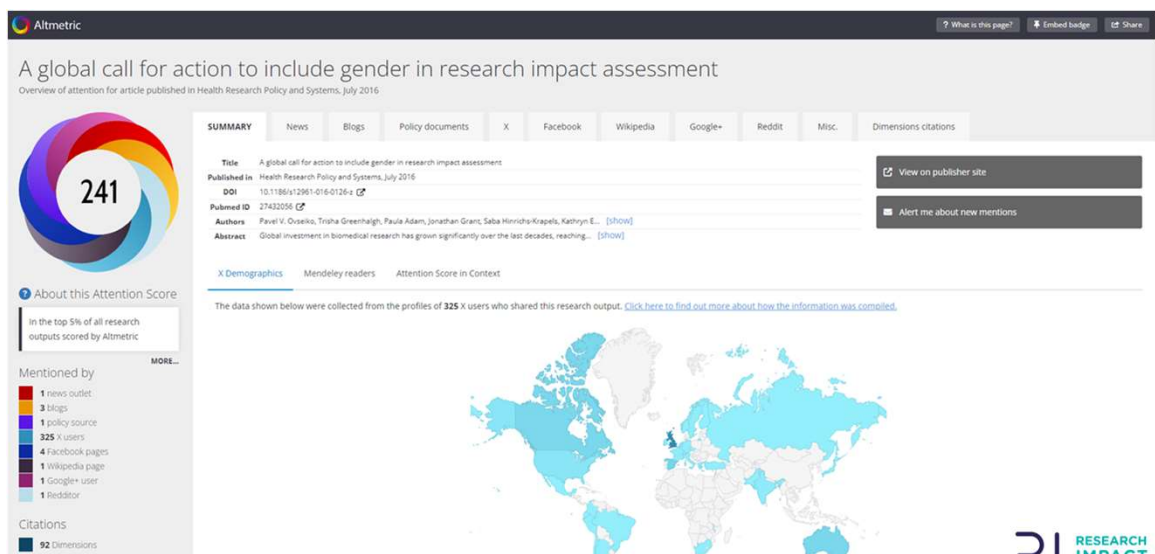

- Access to data and information needed to assess impact can be limited, particularly for ongoing or international projects.
- Balancing the use of quantitative data (e.g., citations, publications) with qualitative data (e.g., narratives, case studies) is a challenge, as each provides a different perspective on impact.

# Tracking Tools

37

## Altmetric

38

## Dimensions

The screenshot shows the Dimensions website interface. At the top, the Dimensions logo is on the left, and navigation links 'Embed badge', 'What is this page?', and 'Share' are on the right. Below the logo is a colorful geometric icon with the number 92. The main title of the publication is 'A global call for action to include gender in research impact assessment'. Below the title, it says 'Publication Article in Health Research Policy and Systems, published July 2016' and lists authors: 'Pavet V. Orseko, Tishia Greenhalgh, Paula Adam, Jonathan Grant, Saba Hinrichs-Krapels, Kathryn E...'. There is a 'View on publisher site' button. Below the title bar, there are tabs for 'Summary', 'Citations', and 'Citing research categories'. The 'Summary' tab is active, showing a summary of the publication. It states: 'This is the public page for a publication record in Dimensions, a free research insights platform that brings together information about funding, scholarly outputs, policy, patents and grants.' Below this, it says: 'This publication in Health Research Policy and Systems has been cited 92 times. 19% of its citations have been received in the past two years.' It also states: 'Compared to other publications in the same field, this publication is extremely highly cited and has received approximately 37 times more citations than average.' There is a 'View more details in Dimensions' button. To the right of the summary, there are four circular icons with numbers: '92 Citations', '18 Recent citations', '37.33 Field Citation Ratio', and '3.15 Relative Citation Ratio'. At the bottom right of the page, there is a logo for 'RESEARCH IMPACT ACADEMY'.

39

## Overton.io

The screenshot shows the Overton.io website interface. At the top, there is a red navigation bar with 'Overton' on the left and 'START', 'SEARCH', 'BROWSE DATA', and 'HELP' on the right. A user profile icon and 'LOGOUT' link are on the far right. Below the navigation bar, there are tabs for 'SEARCH POLICY DOCUMENTS', 'SEARCH PEOPLE', and 'SEARCH SCHOLARLY ARTICLES'. The 'SEARCH SCHOLARLY ARTICLES' tab is active. A search bar contains the text 'e.g. climate change'. Below the search bar, there are links for 'Click to hide search filters', 'Showing articles', 'In the given set of identifiers', and 'sorted by: 17 Published date'. Below this, there is a message: 'We searched for the identifier you supplied and found 1 (100%) matching items in the database.' Below the message, there are links for 'Save search', 'See report', 'Export', and 'Explore'. The main content area shows a list of search results. The first result is 'A global call for action to include gender in research impact assessment' from 'Health Research Policy and Systems on December 1st 2016 (cited by 4)'. Below the title, there is a summary of the article. To the left of the search results, there are filters for 'WITH AFFILIATION' and 'PUBLISHED IN YEAR'. The 'WITH AFFILIATION' filter shows a list of institutions: 'University of Melbourne', 'Agency for Health Quality and Assessment of Catalonia (AQuAC)', 'Assembly of Women for Development and the Struggle against Social Exclusion', 'Birkbeck, University of London', and 'Brandeis University'. The 'PUBLISHED IN YEAR' filter shows '2016'. At the bottom right of the page, there is a logo for 'RESEARCH IMPACT ACADEMY'.

40

## Opensyllabus.org

**OPEN SYLLABUS**

### Mapping the college curriculum across 18.7 million syllabi.

Open Syllabus is a massive non-profit archive of the main activity of higher education: teaching. It provides top-down views of the curriculum across thousands of schools to support curricular innovation, lifelong learning, and student success.

Open Syllabus works to expand the boundaries of open education. Most of its tools are free to use.

- OPEN SYLLABUS EXPLORER**  
Explore what's taught on millions of syllabi at thousands of schools.
- OPEN SYLLABUS GALAXY**  
A navigable view of the whole project of anglophone higher education.
- OPEN SYLLABUS ANALYTICS**  
The 'pro' version of the Explorer with more data and tools. Try it and subscribe.
- OPEN SYLLABUS COURSE MATCHER**  
See which courses should transfer across hundreds of schools.

42

## Scite.ai

The screenshot displays the Scite.ai interface for a specific research article. The article title is "A global call for action to include gender in research impact assessment" by Pavel V. Ovsieko, Trisha Greenhalgh, and Paula Adam. The abstract discusses global investment in biomedical research and the underrepresentation of women. The interface includes a search bar, a sidebar with "Search citation statements" and "Paper Sections" (Introduction, Discussion, Gender and Sex In Biomedical Research), and a main content area showing "Cited by 93 publications" and "References 71 publications". A snippet of text from a cited publication is visible, discussing gender bias in Spanish universities.

SagePolicyProfiles

Log in

### Track your impact on policy

From research and name mentions through to policy citations; utilize data from Overton to track, visualize and share your policy impact. A free tool for individual researchers and academics.

Are you a researcher or an academic? Track how your research has been cited in policy from governments.

Please input your email address to log in or sign up for an account.

Email address \*

Continue

45

## Assessment of your impact

Collating	Capture and sort the data – use tools and other methods.
Selecting	Decide on the best impacts with evidence – based on impact mapping
Crafting	Put it in the story – develop your narrative

46

## Data Analysis

### Collating the data – use a map

- Take all the findings from interviews and tool searches
- Map these into the logic model framework

OUTPUTS	USERS	OUTCOMES	EVIDENCE	IMPACTS	EVIDENCE

## Data Analysis

### Selecting the best impact

Best impact depends on the following factors:

1. Why you are tracking – e.g funding/assessment
2. Types of impact required from any guidance documents e.g policy and practice versus academic impacts
3. Claims that can be evidenced – check back to your map, which outputs can be tracked all the way to the impact column and evidenced.

## Evidence of impact

## Evidence

- Statements and other sources that prove your impact claims.
  - Indicator (\$ in Sales), Evidence (Company Sales Report)
  - Indicator (Minutes to triage patients), Evidence ( Hospital reports/testimonials)
  - Indicator (# of citations), evidence (Scopus/Altmetric report)
- Planning and persistence is needed to collect evidence

**ASK YOUR USERS!**

Use your map to write your  
impact statement -  
prospective

51

## Prospective map:

### Genetic testing of cancer patients for more effective clinical trials

Outputs	Users	Potential outcomes	Potential Impact/benefits
Validation of biomarkers Tailored treatment options Evidence of effectiveness	<ul style="list-style-type: none"><li>American Society for Clinical Oncology</li><li>FDA</li><li>Clinical trials researchers</li></ul>	Guideline changes Review of treatment options Impact the way future clinical trials are run	<ul style="list-style-type: none"><li>Improved quality of life of bowel cancer patients</li><li>Reduce treatment costs</li><li>Improve treatment decision making processes</li></ul>

Copyright 2023 Research Impact Academy

52

# Impact statement

## Genetic testing of cancer patients for more effective clinical trials

### Problem

Colorectal cancer is the second-most common cancer diagnosed in both men and women in Australia. In advanced cases, treatment can involve drugs that block messages from the epidermal growth factor receptors (EGFR), which appear on the surface of some cancer cells and trigger their growth. Two drugs that do this are cetuximab and panitumumab. The former was approved for the market by the US Food and Drug Administration (FDA) in 2004 and the latter in 2006, then subsequently in other jurisdictions such as Australia, Canada, and the European Union (EU). The drugs' effectiveness, however, is in doubt. Despite promise, initial results of clinical trials have not had the expected or desired success rate.

### Output/delivery

### Users

### Outcome

### Impacts

This project will study biomarkers in an effort to predict who will benefit from the drug and **validate the use of biomarkers as a way of tailoring treatments** to match underlying tumour biology. This work will provide **evidence of the effectiveness of personalised medicine in treating colorectal cancer**. If proven, our results will equip the **American Society for clinical Oncology (ASCO) and the FDA** with new evidence **and potential changes to guidelines**, opening up treatment options for select patients. Long term, this work is likely to improve the quality of life of bowel cancer patients, reduce treatment costs, improve treatment decision making processes, and impact the way future clinical trials are run.

53

## Retrospective impact - Language example

### How to show use of your work

- My xxx findings were **adopted** in two international xxx guidelines (Germany, USA) in 2017 with >15,000 downloads in 6 months **[EVIDENCE]**, **led to the development** of the XXX Government palliative care service **[EVIDENCE]**, and **informed** two government policies on x and x (Canada, France) **[EVIDENCE]**. Findings my work were **adapted** into patient & carer education materials (Aust, UK, USA) **[EVIDENCE]**, now **embedded** into CPD for clinicians & nurses in NZ **[EVIDENCE]**

# 1. Useful web links for advice on research impact

## 1.1. Research Impact Academy – Guidance for NHMRC Grants

The Research Impact Academy has published a guide for researchers to understand what to put in each section of the NHMRC impact track record.

<https://researchimpactacademy.com/blog/assessing-research-impact/>

They have also produced a guide for the NHMRC Ideas Grant assessment criteria

<https://researchimpactacademy.com/blog/innovation-creativity-and-significance-in-ideas-grants/>

## 1.2. Melbourne Children's Knowledge Translation and Research Impact Project

This project developed and is currently implementing a framework to better support the translation of knowledge into practice and policy and enhance the impact of research undertaken at Melbourne Children's.

[https://www.rch.org.au/ccch/research-projects/Melbourne Children s Knowledge Translation and Research Impact Framework Project/](https://www.rch.org.au/ccch/research-projects/Melbourne_Children_s_Knowledge_Translation_and_Research_Impact_Framework_Project/)

## 1.3. AAMRI Research Impact Framework

The Research Impact Project aims to deliver a standardised framework that will enable Australian medical research institutes to measure the impact of their research and its contribution towards knowledge, society, health and the economy.

<https://www.aamri.org.au/members/theresearchimpactproject/>

## 1.4. Fast Track Impact

UK Professor Mark Reed provides a list of resources and advice on planning for impact.

<https://www.fasttrackimpact.com>

## 1.5. CSIRO-wide approach to impact

CSIRO's approach to impact management assumes that in order to understand the value of research, it must be possible to track the process by which research translates into benefits in the real world. Planning, monitoring and evaluating impact is based on a theory of change model called program logic

<https://www.csiro.au/en/about/corporate-governance/ensuring-our-impact/a-csiro-wide-approach-to-impact>

### 1.6. NHMRC Impact case studies

NHMRC produces Impact Case Studies to demonstrate its contribution to raising the standard of individual and public health throughout Australia.

Each case study is developed in partnership with one or more Australian research organisations and other bodies. <https://www.nhmrc.gov.au/about-us/resources/impact-case-studies>

### 1.7. Real Impact Institutional Healthcheck workbook

This workbook is designed to help institutions consider how 'healthy' they are in terms of supporting and generating impact, and identify how they can improve it. It can be used by anyone within the institution, but is aimed primarily at those leading impact, overseeing research delivery or more broadly driving organisational change.

<https://www.emeraldpublishing.com/wordpress/wp-content/uploads/Emerald-Resources-Institutional-Healthcheck-Workbook.pdf>

### 1.8. Making an Impact: Canadian Academy of Health Sciences

A simplified version of the CAHS evaluation framework developed by the panel to understand the processes and pathways to health research impacts.

[https://www.google.com/url?sa=t&rct=j&q=&esrc=s&source=web&cd=&ved=2ahUKEwj6nJrEqpr0AhWVbn0KHe5UA\\_wQFnoECAgQAQ&url=https%3A%2F%2Fwww.caahs-acss.ca%2Fwp-content%2Fuploads%2F2011%2F09%2FROI\\_FullReport.pdf&usg=AOvVaw26y1U2UGcq3ye\\_usEQOMou](https://www.google.com/url?sa=t&rct=j&q=&esrc=s&source=web&cd=&ved=2ahUKEwj6nJrEqpr0AhWVbn0KHe5UA_wQFnoECAgQAQ&url=https%3A%2F%2Fwww.caahs-acss.ca%2Fwp-content%2Fuploads%2F2011%2F09%2FROI_FullReport.pdf&usg=AOvVaw26y1U2UGcq3ye_usEQOMou)

### 1.9. London School of Economics (LSE) research blog Impact of Social Sciences

A platform for understanding and increasing the impact of academic research.

<https://blogs.lse.ac.uk/impactofsocialsciences/>

### 1.10. NIHR plan for impact

Impact is defined as the demonstrable contribution that research makes to society and the economy, of benefit to individuals, organisations and nations. Generating impact from research is highly context dependent, takes time, involves serendipity, and, often, comprises a series of small incremental changes carried out collaboratively. However, 'impact' is the term for the outcome not the process itself. This is better described as knowledge mobilisation. Knowledge mobilisation is made up of processes and activities like engagement, dissemination, co-design and commercialisation.

<https://www.nihr.ac.uk/researchers/apply-for-funding/how-to-apply-for-project-funding/plan-for-impact.htm>

## 2. Research Impact toolkits

### 2.1. UWA Research Impact Toolkit

This Toolkit is designed to help you start planning an impact strategy for your research. Impact plans differ between disciplines, individuals and between projects. The following tips and tools will help you begin planning your own knowledge exchange and impact strategy.

<https://www.rdi.uwa.edu.au/research-impact-toolkit>

### 2.2. The Canadian Knowledge Mobilisation toolkit

This site has many tools to help researchers plan, carry out and evaluate knowledge mobilisation activities. <http://www.kmbtoolkit.ca/the-toolkit>

### 2.3. The ESRC impact toolkit

Although for social science research, this site is very good on how to collaborate and influence policymakers. 50 case studies are available. <https://aka.esrc.ukri.org/research/impact-toolkit>

### 2.4. The Health Foundation communication toolkit

Excellent resource for understanding communications strategies in general, and the communications strategy template is particularly good.

<https://www.health.org.uk/publications/communicating-your-research-a-toolkit>

### 2.5. Emerald Publishing Impact Literacy toolkit

Focuses on the first step as identifying the problem in collaboration with research users.

<https://www.emeraldgrouppublishing.com/sites/default/files/2020-06/Impact%20Literacy%20Workbook%20Final.pdf>

# CAHS Research Education Program

## 2024 Research Skills Workshop Series

### Manuscript Writing Workshop

11th June 2024

2.00 - 4.00pm

Journal publications are an integral part of dissemination of research findings. However, it can be overwhelming to convert several months of research into a succinct manuscript that will be loved by peer-reviewers and attract readers.

This workshop is designed to give those who have completed their research projects, practical skills to transform their research data into publishable peer-reviewed literature.

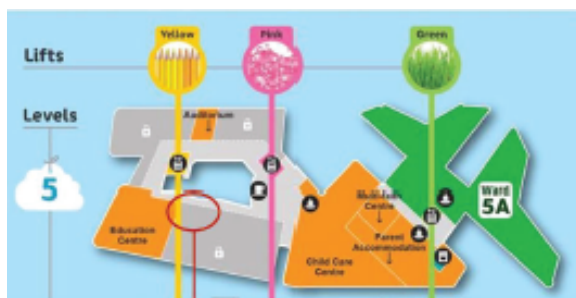

#### Meet the presenter

**Dr Kenneth Lee**  
Senior Lecturer, Pharmacy Practice,  
University of Western Australia

Dr Kenneth Lee is a Senior Lecturer and clinician. As a clinician, Dr Lee works in a large medical centre as the in-house pharmacist, as well as in private consultancy, where he primarily delivers comprehensive medication management review services to domiciliary patients. Dr Lee is passionate about integrating practice, research, and teaching.

## 2024 Research Skills Workshop Series

The Research Education Program (REP) Research Skills Workshop Series, supported by the Perth Children's Hospital Foundation and the Telethon Kids Institute, offers a series of interactive workshops that focus on building the most fundamental research skills required to undertake clinical research projects.

Workshops aim to directly build user skills and knowledge in a guided environment, with time to ask questions specific to your own project.

**Presented by:** CAHS Research Department and invited guests

**Location:** PCH, TKI Seminar Room, Level 5 (W)

Topic	Day	Date	Time	Max (in-person)
<b>Workshop 4 - Navigating Research Ethics and Governance in WA</b> If you are undertaking a research project or are thinking about becoming involved in research, understanding the review and approval requirements for your research project may appear intimidating. This workshop aims to help you understand the process of ethical and governance review for research approvals at CAHS - includes PCH, CACHS, CAHMS and Neonatology.	Tue	23 April	2.00pm - 4:00pm	<a href="#">Watch</a>
<b>Workshop 1 - Setting up Clinical Trials</b> Clinical trials are the benchmark for testing interventions in healthcare. This workshop aims to provide practical advice to clinical researchers who want to gain insight on how to develop and complete their clinical trial on time and within budget. Come learn practical aspects of the steps involved in developing a clinical trial from the research idea to protocol development and execution.	Mon	20 May	12.00 noon - 2.00pm  PCH level 6 TKI Manda	<a href="#">Watch</a>
<b>Workshop 2 - Manuscript Writing</b> Journal publications are an integral part of dissemination of research findings. However, it can be overwhelming to convert several months of research into a succinct manuscript that will be loved by peer-reviewers and attract readers. This workshop is designed to give those who have completed their research projects, practical skills to transform their research data into publishable peer-reviewed literature.	Tue	11 June	2.00pm - 4:00pm	40 <a href="#">Register</a> 
<b>Workshop 3 - Oral Presentation of Research Results</b> Dissemination of research findings is integral in knowledge translation and clinical practice change. Oral presentations provide rapid dissemination of research findings to a target audience. We invite you to a practical session that will provide useful tips, practice sessions and personalised feedback to help deliver an adequate depth of your research findings to various research stakeholders.	Tue	13 Aug	2.00pm - 4:00pm	40 <a href="#">Register</a> 

### IMPORTANT

Places are strictly limited and offered on a first-come, first-serve, basis. If you are not able to attend a workshop for which you have registered, please contact Research Education Program support via phone or email to cancel your reservation and/or be placed on the waitlist.

## 2024 Seminar Schedule

#	DATE	TOPIC	PRESENTER	ENROL	WATCH
1	9 Feb	<b>Research Fundamentals</b>	Dr Kenneth Lee, UWA	-	<a href="#">2024</a>
2	16 Feb	<b>Introductory Biostatistics</b>	Michael Dymock, TKI	-	<a href="#">2024</a>
3	8 Mar	<b>Social Media in Research</b>	Dr Amy Page, UWA	-	<a href="#">2024</a>
4	22 Mar	<b>Introduction to Good Clinical Practice</b>	Alexandra Robertson, CAHS	-	<a href="#">2024</a>
5	19 Apr	<b>Research Governance</b>	Dr Natalie Giles, CAHS	-	<a href="#">2024</a>
6	3 May	<b>Scientific Writing</b>	A/Prof Tony Kemp, UWA	-	<a href="#">2024</a>
7	17 May	<b>Project Management</b>	Melanie Wright, SMHS	-	<a href="#">2024</a>
8	7 Jun	<b>Research Impact</b>	Dr Tamika Heiden, Vic	-	<a href="#">2023</a>
9	14 Jun	<b>Consent and Participant Recruitment</b>	Prof Daniel Fatovich and Mark Woodman, EMHS	<a href="#">REGISTER</a>	2024
10	21 Jun	<b>Consumer &amp; Community Involvement in Research</b>	Belinda Frank, TKI	<a href="#">REGISTER</a>	<a href="#">2023</a>
11	19 Jul	<b>Getting the Most out of Research Supervision</b>	Dr Timothy Barnett, TKI	<a href="#">REGISTER</a>	<a href="#">2022</a>
12	26 Jul	<b>Oral Presentation of Research Results</b>	Dr Giulia Peacock, CAHS	<a href="#">REGISTER</a>	<a href="#">2023</a>
13	2 Aug	<b>Sample Size Calculations</b>	Michael Dymock, TKI	<a href="#">REGISTER</a>	<a href="#">2023</a>
14	9 Aug	<b>Rapid Critical Appraisal of Scientific Literature</b>	Dr Natalie Strobel, ECU	<a href="#">REGISTER</a>	<a href="#">2023</a>
15	16 Aug	<b>Media and Communications in Research</b>	Peta O'Sullivan, CAHS	REGISTER	<a href="#">2023</a>
16	23 Aug	<b>Knowledge Translation</b>	Prof Fenella Gill, Curtin/CAHS	REGISTER	<a href="#">2023</a>
17	30 Aug	<b>Conducting Systematic Reviews</b>	Prof Sonya Girdler, Curtin Uni	REGISTER	<a href="#">2023</a>
18	6 Sep	<b>Involving Aboriginal Communities in Research</b>	Cheryl Bridge, TKI and co.	REGISTER	<a href="#">2023</a>
19	11 Oct	<b>Grant Applications and Finding Funding</b>	Dr Tegan McNab, TKI	REGISTER	<a href="#">2023</a>
20	18 Oct	<b>Data Collection &amp; Management (REDCap)</b>	Dr Giulia Peacock, CAHS	REGISTER	<a href="#">2023</a>
21	25 Oct	<b>Statistical Tips for Interpreting Scientific Claims</b>	Michael Dymock, TKI	REGISTER	<a href="#">2023</a>
22	1 Nov	<b>Survey Design and Techniques</b>	Dr Giulia Peacock, CAHS	REGISTER	<a href="#">2023</a>
23	15 Nov	<b>Ethics Processes for Clinical Research in WA</b>	Dr Natalie Giles, CAHS	REGISTER	<a href="#">2023</a>
24	22 Nov	<b>Qualitative Research Methods</b>	Dr Lorna Davin, Uni Notre Dame	REGISTER	<a href="#">2023</a>
25	29 Nov	<b>Innovation and Commercialisation</b>	Dr Helga Mikkelsen (Brandon BioCatalyst) & Ashley Schoof (TKI)	REGISTER	<a href="#">2022</a>

## Research Skills Seminar Series

A free, open-access resource designed to upskill busy clinical staff and students and improve research quality and impact.

# Consent & Participant Recruitment

14th June 2024

12.30 - 1.30pm

Effective consent and recruitment strategies are vital for upholding ethical principles of beneficence and justice. This seminar covers important updates to the Guardianship and Administration Act which impact the recruitment of incapacitated adult patients into research.

### Prof Daniel Fatovich

Emergency Physician,  
Director of Research EMHS  
Head, Centre for Clinical Research  
in Emergency Medicine, Harry Perkins  
Institute of Medical Research,  
Professor of Emergency Medicine, UWA

As Director of Research for East Metropolitan Health Service (EMHS), Prof Fatovich provides strategic advice and leadership. In 2020 and 2023, he was Ministerial adviser for the passage of the Guardianship and Administration (Medical Research) Act Western Australia. He loves to challenge doctors to think, and to think differently.

**East Metropolitan Health Service**

### Mark Woodman

Manager  
Research Department  
East Metropolitan Health Service

Mark has worked in research ethics and governance | since 2008 and has managed the EMHS Research Hub since 2019. He takes a supportive and facilitatory approach, aiming to help clinician researchers and partners navigate regulatory requirements. The EMHS has strong ED and ICU research teams, with services enrolling more than 200 patients under the Guardianship Act Part 9E. Mark has been instrumental in the training and support of researchers using the Act.

## Research Skills Seminar Series

A free, open-access resource designed to upskill busy clinical staff and students and improve research quality and impact.

### Consumer & Community Involvement in Research

21st June 2024

12.30 - 1.30pm

Every researcher should be actively involving consumer or community members to improve quality and increase impact of their research. Community involvement is increasingly a requirement for funding agencies. This seminar provides a practical introduction and will cover basic principles of consumer and community involvement, the benefits and barriers, and what to put in place to get started.

#### Meet the presenter

**Belinda Frank**  
Involvement Coordinator – Telethon Kids Institute

Belinda is the Involvement Coordinator at Telethon Kids Institute. She started her consumer advocacy work in 2002, originally as a board member and then state manager for a not for profit organisation. In 2016 she started work at the Telethon Kids Institute as the Consumer Advocate then moving into the Development Team with the establishment of the Consumer and Community Health Research Network. Belinda currently serves on state and national research committees.

## REDCap Workshop Series

Research Electronic Data Capture

The Research Education Program - supported by the Perth Children's Hospital Foundation and the Telethon Kids Institute - offers a series of hands-on workshops that focus on the most integral features of REDCap and its application to your research project data. Workshops aim to directly build user skills in a guided environment, with time to ask questions and work on your own project.

Dates below are still being finalised so check back again for latest version.

**Presented by:** Research Education Program Research Fellow Dr Giulia Peacock

**Location:** PCH, TKI Seminar Room, Level 5 (West).

Topic	Day	Date	Time	Max No (in person)
Workshop 1 – Basic Walkthrough	Tuesday	27 Feb	2:30pm to 4:30pm	<a href="#">Watch</a>
Workshop 2 – Intermediate Walkthrough	Tuesday	12 March	1:00pm to 3:30pm	<a href="#">Watch</a>
Workshop 3 – Advanced REDCap - Creating Surveys	Tuesday	30 April	1:00pm to 3:30pm	recording coming soon
Workshop 4 – REDCap Troubleshooting Workshop	Tuesday	28 May	2:00pm to 4:00pm	cancelled
Workshop 5 – Basic Walkthrough	Tuesday	16 July	1:00pm to 3:30pm	40 <a href="#">Register</a>
Workshop 6 – Intermediate Walkthrough	Tuesday	20 Aug	1:00pm to 3:30pm	40 <a href="#">Register</a>
Workshop 7 – Advanced REDCap - Creating Surveys	Tuesday	10 Sep	2:00pm to 4:30pm	40 Register
Workshop 8 – REDCap Troubleshooting Workshop	Tuesday	15 Oct	1:00pm to 3:30pm	40 Register

### IMPORTANT

**Attendance is open to all Department of Health and Telethon Kids Institute staff.**

Places are strictly limited and offered on a first-come, first-serve, basis. If you are not able to attend a workshop for which you have registered, please contact Research Education Program support via phone or email to cancel your reservation and/or be placed in another workshop or on the waitlist.

## Workshop Series

### REDCap Workshop 5: Basic Walkthrough

16th July 2024 1.00 - 3.30pm

#### *An introduction to project set-up*

Workshops aim to directly build user skills in a guided environment, with time to ask questions and work on your own project.

This workshop offers an introduction to building databases in REDCap and covers basic concepts and best practices to equip researchers in building a database for their research project.

Basic Walkthrough is most useful to anyone building a new project in REDCap and those who have been tasked with managing an existing database. Open to all WA Health and TKI staff only.

#### Meet the presenter

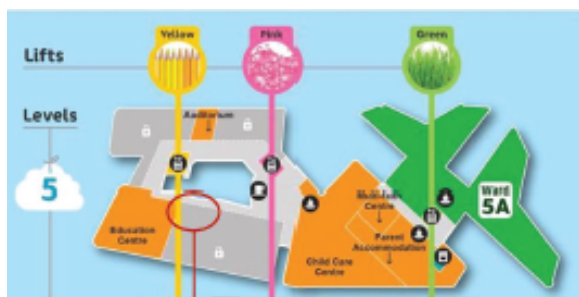

**Dr Giulia Peacock**

**CAHS Research Education Program Research Fellow**

Giulia graduated medical school from the University of Notre Dame Fremantle in 2014. She supplements her clinical work as an Advanced Paediatric Trainee by conducting and publishing research in paediatric cardiology and through active involvement in medical education.

She is currently completing her Masters in Clinical Science, Child Health Research at the University of Western Australia. She hopes to ensure easy accessibility to research education and support, to create best outcomes for all patients.
