Why is sleep important?

Babies grow fast!

Sleep helps their **brain** and **body grow strong**.

Every baby is different.

Some babies **sleep well**, **others** may **need** a bit of **help**.

This guide will **help**.

If getting your **baby** to **sleep** feels **hard**, you are **not alone**.

Many families go through this.

How much sleep does baby need?

Your baby will need **12-16 hours total sleep**. This includes **2-3 naps** during the **daytime**.

This should include **9-12 hours of night time sleep**.

You can **help** your baby get the sleep they **need**. By following the **SLEEPSS** Sleeping tips.

7 Sleeping tips: SLEEPSS

1. Set a bedtime routine

Try starting a **simple** plan. Such as
Bath → **Brush teeth/gums** →
Story → **Cuddle** → **Into cot.**

2. Lock in bedtime

Put your baby to sleep at the
same time every night.

3. Encourage self-settling

Put your **baby** in **bed** when they
are **sleepy** but awake.

This **helps** them learn to **fall**
asleep on their **own**.

4. **E**nsure safe sleep

Put your **baby on their back** to sleep. Make sure their **head** and **face** are **uncovered**.

Keep your baby **away from smoke**, before and after birth.

The **safest place** for your baby to **sleep**, is their **own space** in **your room** with correct bedding.

We **do not recommend sleeping with your baby**.

5. Peaceful night time responses

Babies may still **wake** at **night**.
Respond gently. Brief, **quiet comfort** helps them **settle**.

6. Spot sleepy signs

Look for **sleepy signs** like rubbing eyes, **yawning**, losing interest in play. **Overtired babies** may not fall asleep very well.

7. Stay patient and consistent

Sleep issues may take time to **change**.

Sleep associations

A **sleep association** is **something** your **baby** gets **used to** for sleep, like **rocking**, **feeding**, **patting**, **being held** or **using** a **dummy**.

These can **comfort** your **baby now**, but **may lead** to your **baby** needing **help** when they **wake up** during the **night**.

Changing sleep associations

Slowly do **less rocking** each night, until your baby **learns** to **sleep on** their **own**.

Instead of **rocking**, try **gently patting** your baby while they **lie** in the **cot**.

Each night, move a little **farther away**. Start **next** to the **cot**, then a few steps **back**, then **outside** the **room**.

Keep doing this **slowly** until your baby learns to fall **asleep** by **themselves**.

Some nights will be hard.

If your baby was born early

Babies born before **37 weeks** might take **longer** to learn **sleep** habits. Give them **extra time**.

Babies born early may need **extra help** learning to **settle** and **sleep well**.

Be **patient** and **consistent**.

Make small sleep **changes**, follow the **same bedtime steps**, and **stay close** while your baby learns.

When to see a doctor?

Some babies need **help** with **sleep**. It is **important** your baby gets the **right amount of sleep**.

Poor sleep can **affect feeding** and **weight gain**.

See your doctor if your baby **breathes strangely** at night, **snores loudly**, or **drools a lot**.

If your baby **wakes often** or seems **tired during** the **day**, **trust** your own **feeling** and **ask** for **help**.

Referrals

Your **GP or doctor** is your **first** point of **contact**.

Your GP can refer you to Ngala for more sleep advice.

Or refer you to a private doctor or specialist clinic.

The Sleep Clinic at Perth Children's Hospital
(to check sleep and breathing)

Or

The Ear Nose and Throat (ENT) Clinic at Perth Children's Hospital
(to check for airway problems).

Resources

There are good resources for sleep.

Ngala gives information and advice.

Ngala has a **Parenting Line** which is open 8am-8pm for advice on sleep issues.

The number is **(08) 9368 9368**.

Ngala **welcomes all cultures**.

Other **helpful links** include:

Australian Government's
Raising Children Network

Sleep resources from
Royal College of General Practitioners

Australian Sleep Health Foundation
