

Clinic D

Budget:

If the research project includes the use of Clinic D, this must be captured in the budget on RGS. The Research Department must be identified as a separate department on the budget and clinic D added as a line item under this department. The cost of clinic D is \$40 an hour which can be provided in-kind for projects led by CAHS Principal Investigators. Please invite the HOD for clinic D to sign off on the budget.

Access hours:

Note that clinic D is accessible between 0800 hrs and 1700 hrs Monday to Friday. Clinical Research resources may be used for after-hours research activity when this is deemed appropriate by the Director, Department of Research or delegate. Please contact the governance office to discuss after hours arrangements.

Interventional Research:

If blood draws or any interventional procedures are to be conducted in Clinic D, please provide a signed "Participant Safety Checklist for Interventional Research" for our review. Safety Checklist can be found on HealthPoint: <https://cahs-healthpoint.hdwa.health.wa.gov.au/directory/research/researchers/Checklists%20Documents/Safety%20Checklist%20for%20Interventional%20research%202023.pdf>

Compliance:

Staff, students and visiting researchers must comply with requirements of the approving HREC, all other applicable regulatory bodies and policies and procedures, and have a responsibility to report all hazards, incidents and injuries.
